HOLLYWOOD BOWL SHELL REHABILITATION PROJECT

Following is an update on the Hollywood Bowl Shell Rehabilitation Project.

As you know, on January 15, 2004, we had the ceremonial completion of the structural steel. Work is continuing on the installation of metal decking, concrete, waterproofing, and electrical systems. Off-site fabrication of the acoustic canopy is underway. On January 8, 2004, we visited the factory to inspect the performance turntable, and it is scheduled to be delivered to the site this week. The project remains on schedule to be completed by June 10, 2004.

Attached for your information are some construction progress photos.

We will continue to provide you with periodic updates throughout the construction.

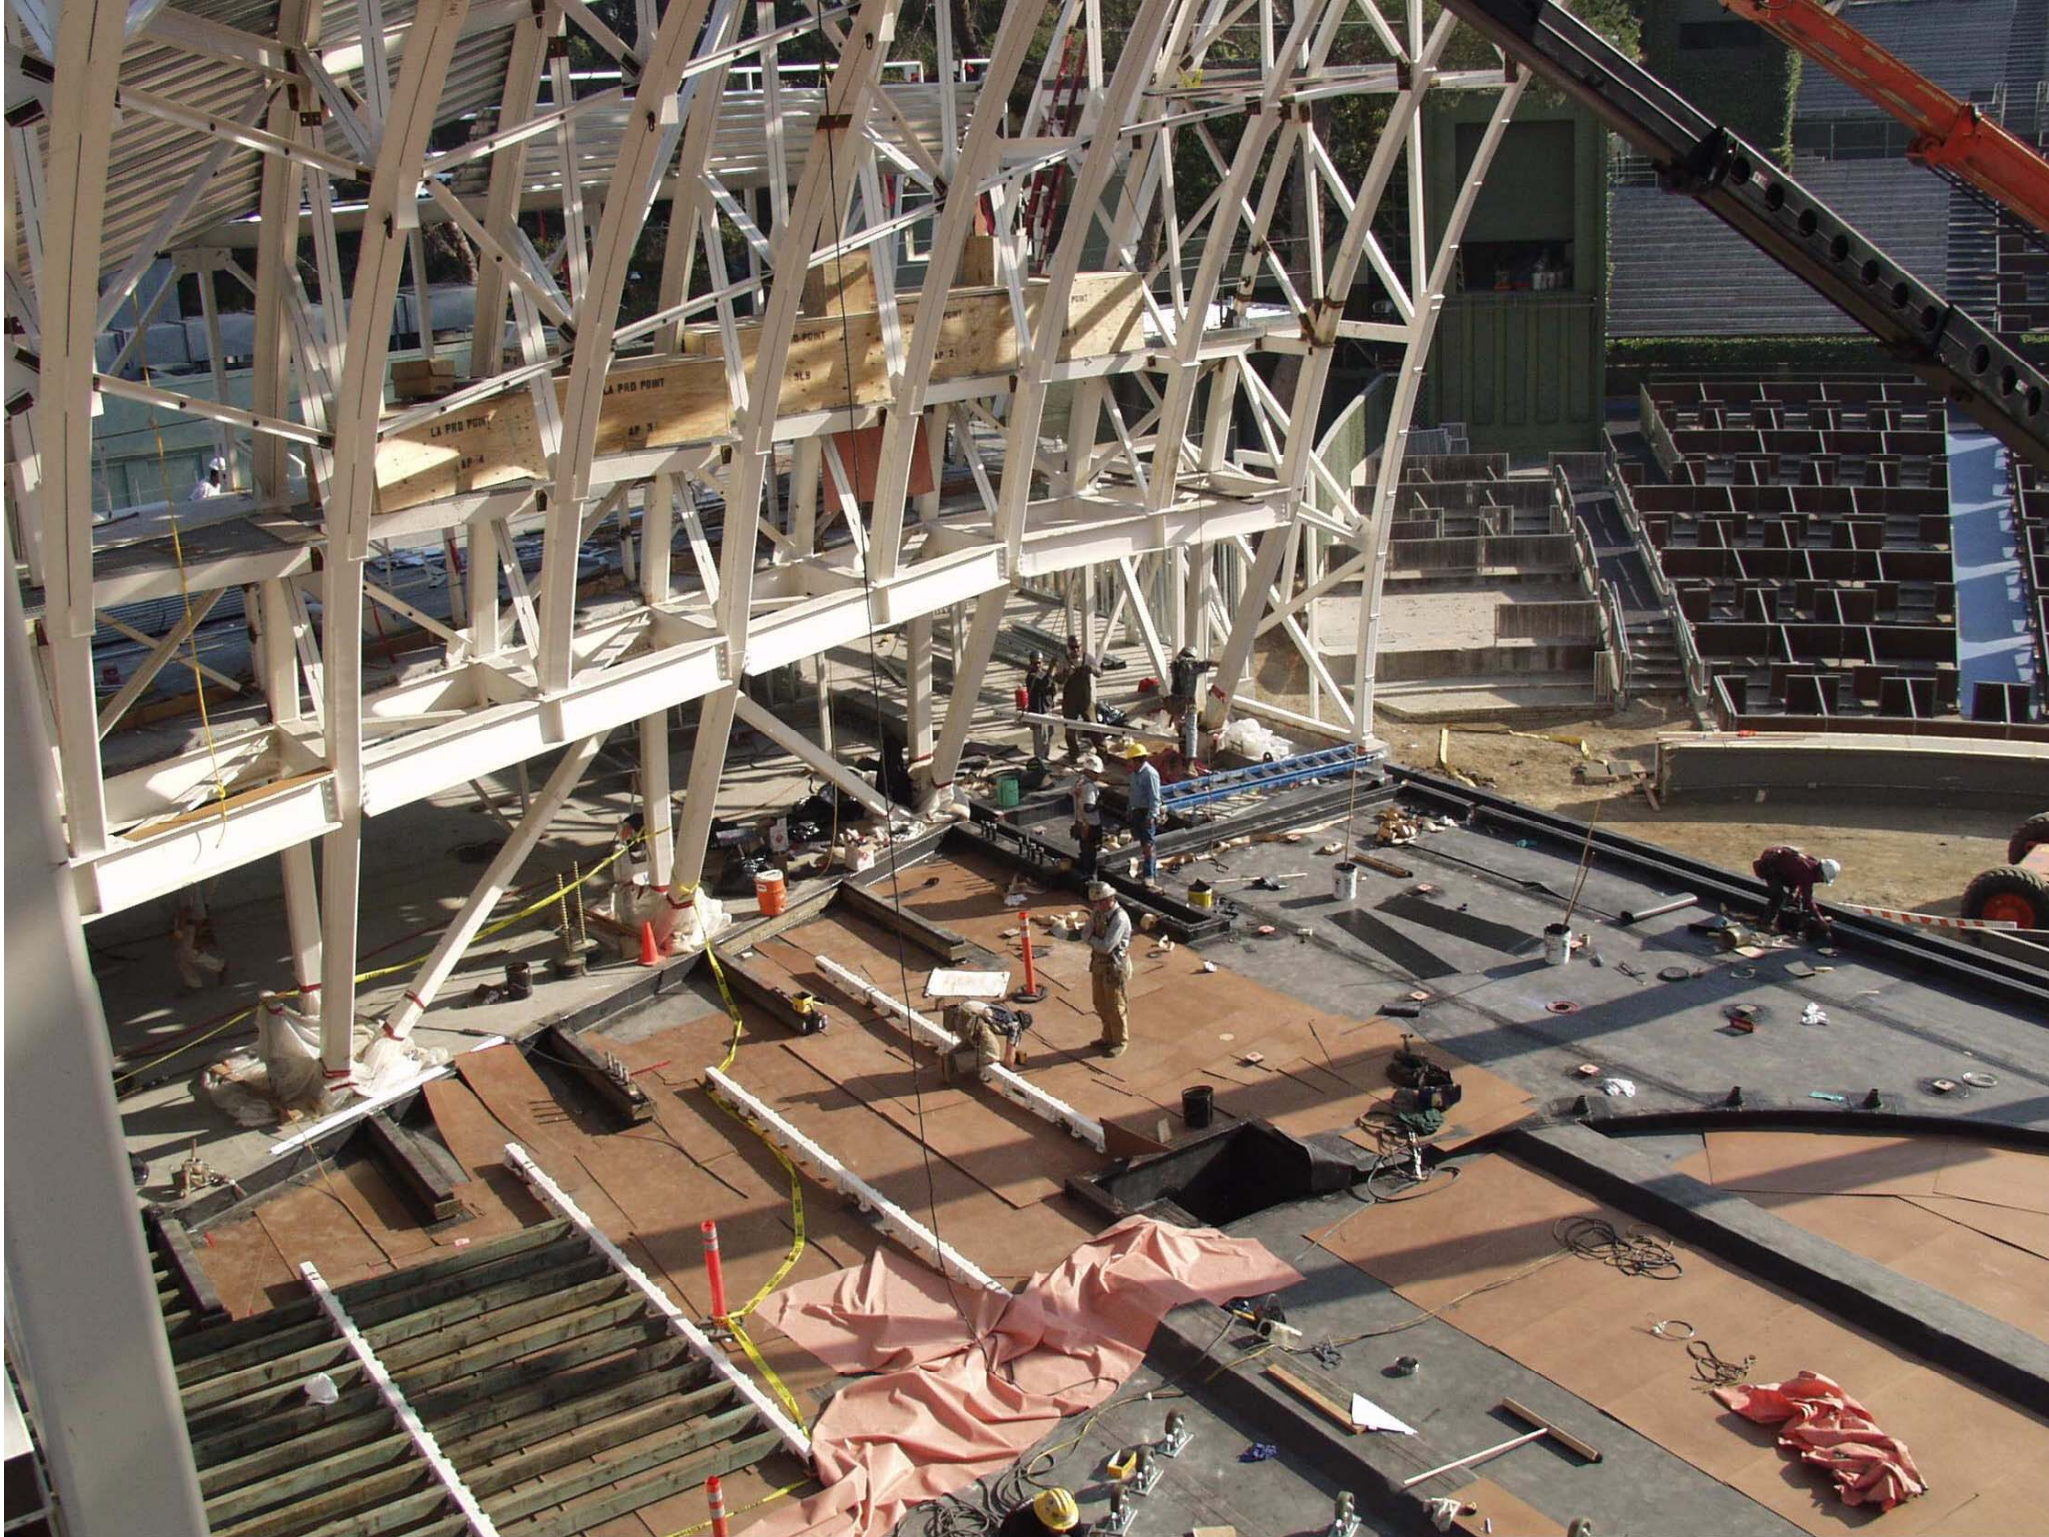

If you have any questions, please call me or your staff may contact David Howard at (626) 300-2300.
